Re: Letter of Appreciation/Results

At the Four Seasons Hotel Atlanta, the only Five Star, AAA-Five Diamond Hotel in Georgia, our Engineering Department Utilizes the ChlorKing saline chlorination to cleanse our Olympic-size neo-classic marble, indoor pool.

Prior to using Chlorking, our Health Club and Front Desk employees often heard guest complaints about burning eyes and chafing skin as a result of swimming in our pool, which at the time was cleansed with traditional chlorine. In addition, the ChlorKing system & product is environmentally friendly and is easy to operate.

As a luxury hotel, we want everything that our guest's experience to be most memorable. We began looking at alternatives for cleaning the pool, and since using ChlorKing, we, as well our guests, have been satisfied. In fact, the sales team now highlights the pool and its saltwater feature as a selling point to their clients, We are definitely satisfied customers!

John W. King
