

“ Our members love the water now, no more burning eyes, irritated skin or discolored swimming suits. ”

Broken Sound Club, located in Boca Raton, FL is 1,000 acres of luxurious homes and prime real estate. The club features an exclusive golf course, club house, up-scale dining and state-of-the-art fitness center and spa. Needing a change, Broken Sound installed ChlorKing® saline chlorinators four years ago.

“Our members would complain their eyes would burn or their skin would be irritated after swimming in the water” said Tomkins. “They do a lot of water exercise and they didn’t want a room that smelled bad or of chemicals”

“We decided to go with a saline chlorination system because we knew it was an excellent water sanitizer and it makes the water feel softer.” Tomkins went on to explain that they were happy to “minimize their use of harsh chemicals:..

“The ChlorKing® system is definitely a selling point for Broken Sound. Our members want a country club life. Having a pool like this gives them peace of mind.”

“Saline chlorination has saved us so much money and water,” Tomkins added. “Having the ChlorKing® system is the difference between doing something poorly and doing it the right way.”
