CUSTOMER TESTIMONIALS

WHEN THEIR GUESTS ARE HAPPY, THE OWNERS ARE HAPPY.

Bridgemill athletic club's new NEXGEN chlorine generators are leading the way to better, safer water.

"Maintaining a 680,000 gallon swimming pool is never easy, especially with slides and waterfalls attached, but ChlorKing's NEXGEN systems have proven to us that their is a better, safer method. We are so happy we made the change"

- Loui Padgett, Recreation and fitness director.

Re: ChlorKing X-GEN systems you installed at our facility.

Dear Steve,

We installed your X-GEN on-site chlorine generators at our facility in Canton, Georgia in May of 2009 on our 680,000 gallon outdoor swimming pool and water park, and have been very pleased with their performance.

The systems have performed as you described and the overall operation has been excellent. The reduction in purchasing and storing traditional chlorine has been exactly what we were looking for and this has not only made our facility safer, but has also allowed us to move towards a more sustainable solution for the chlorination of our pool.

Your X-GEN systems really do what you say they will and it's a pleasure working with a company that not only builds a quality product, but stands by that product as well.

Thank you for all you and your team do for Bridgemill Athletic Club.

Yours Sincerely,

Loui Padgett
Recreation & Fitness Director

A Golf & Family Club Community

ChlorKing pioneered on-site chlorine generating technology in the 1970's. Realizing the potential for swimming pools and commercial applications, the company began generating "ultimate water" with simple, yet highly advanced technology. Today, ChlorKing® leads the way in commercial saline chlorination and is consistently seeking new frontiers in sanitizing solutions including ultraviolet light technology and their NEX-GEN® pH onsite chlorine generators. These environmentally friendly solutions are changing the way we treat H²O.

Safer water through smarter technology.
