

## CUSTOMER TESTIMONIALS

### WHEN THEIR PATRONS ARE HAPPY, THE OWNERS ARE HAPPY.

ChlorKing commercial salt chlorinators and ultraviolet light systems are leading the way to better, safer water.

“We switched to the salt system after years of complaints from our patrons concerning chlorine irritation, smell and corrosive effects of the liquid chlorine. After our first year of operation with the salt system, the response from patrons was phenomenal”

- Tom Cloer III, Assistant town manager.

## OUR COLLECTION CONTINUES TO GROW

As the Assistant Town Manager for the Town of Central, South Carolina, it was an easy choice to heed the advice of Dr. Jim Pope when it came to upgrading our Therapy pool and Lap pool at our Indoor Recreation Center with a ChlorKing Salt System and UV System. I have known Dr. Pope for 20 years and his knowledge of Pool Chemistry and systems is well regarded. We switched to the Salt System after years of complaints from our patrons concerning chlorine irritation, smell, and corrosive effects of the liquid Chlorine. After our first year of operation with the Salt System, the response from Patrons was phenomenal. Bathing suits started lasting 8-10 times longer than with use of Chlorine, our Chlorine irritation complaints went from around 10 per month to 0 and have not had a complaint about irritation in 8 years. One issue we did have is with the large amount of use the pools were receiving from 6-8 water aerobic classes, a swim team comprised of 30 plus members, and free swim patrons, the Chloramine level would be high by the end of the day and the smell would be very strong. We installed ChlorKings UV system on each pool. We saw dramatic changes within the first 2 days of operation. Chloramine levels and smell went to barely detectable levels and the water became crystal clear. These two components have been so beneficial not only from a comfort level for patrons, but reducing liability issues for the facility due to Chlorine irritation. Most importantly, our pools are sparkling clear and the water softness very comfortable which gives reassurance to our patrons that the pools are well cared for. I would not build another pool facility without having these two systems from ChlorKing installed.

Assistant Town Manager  
Town of Central, SC

ChlorKing pioneered on-site chlorine generating technology in the 1970's. Realizing the potential for swimming pools and commercial applications, the company began generating "ultimate water" with simple, yet highly advanced technology. Today, ChlorKing® leads the way in commercial saline chlorination and is consistently seeking new frontiers in sanitizing solutions including ultraviolet light technology and their NEX-GEN® pH onsite chlorine generators. These environmentally friendly solutions are changing the way we treat H<sup>2</sup>O.
